...setting new standards in modern heating, and it doesn't cost the earth...

Wood-pellet-stoves for the 2004 heating season

Our Wood pellet stoves offer clean efficient heat at the flick of a switch. Environmentally friendly and beautiful to look at, these low maintenance units will enhance the décor of any room.

Noise emissions were a prime consideration during the design of these stoves, which are probably the quietest available. Optionally the combustion fan can be fitted away from the stove to reduce the noise even further (on some models only).

Build to EU standards all the stoves featured below are registered as "Approved Appliances" with the Clear Skies and SCRI grant schemes, under which householders and community groups in the Northern-Ireland, UK, Scotland, Germany and other parts of the EU (**no grants for Irish customers**) may apply for grants towards the total installed costs of up to 30% (Householders) and 50%+ (Community) – see www.clear-skies.org or telephone 0800 138 8858 for more information.

Preziosa 5 kW

ECOLOGICAL IDRO 15kW central heating stove

We now offer two stove models with integrated boiler. These stoves provide a continuous (when lit!) 8 kW of hot water towards the central heating load plus some space heating. They are ideally suited to an integrated central heating system incorporating for instance; solar, ground source heat pumps or to augment an existing Oil or LPG boiler. The 8kW output will match the average heat load of a modern 3-4 bedroom home.

Technical Details: Ecological Idro 15 kW

- Dimensions H 953mm x D 670mm x W 677mm
- Rated at 15 kW at approx. 90% efficiency
Supplied with 8kW back-boiler
- Heat output can be turned down to ~2kW.
- Self-lighting at press of a button thanks to electric ignitor fitted as standard.
- Comes with on-board thermostat and timer as standard
- 30 kg hopper capacity typically lasts 3 days
- Air wash system to keep glass clean
- Rubber capped adjustable legs for levelling
- Suitable wood pellet-fuels, 6- 8mm Ø
